

## **\$1,000,000 Matching PATRIOT GRANT Program**

### **Help PATRIOT MISSION train 5000 Veterans to become Self-Employed Leaders**

The PATRIOT GRANT Program serves United States Armed Service Veterans who have been honorably discharged or retired from active duty service. Many of our veterans have been downsized from their jobs due to unexpected budget cuts. In our weak economy, many veterans find it extraordinarily challenging to translate their military specialties into full-time income.

Strong Leadership is one of the most valuable and consistent characteristics among our veterans from all branches of service. The NATIONAL RESTORATION PROJECT requires BOLD Leaders to successfully strengthen our economy, unite our citizens and rekindle American pride. By effectively connecting veterans and experienced entrepreneurs in every county, independent city and parish across the USA, PATRIOT MISSION is building a powerful, independent work force that is promoting small businesses and serving local communities.

Orienting veterans to the world of self-employment and small business takes time. Our Professional Development Program equips veterans to either pursue unique business opportunities or go to work as an independent PATRIOT MISSION Partner helping develop specialty, county or state markets. This training requires significant resources.

In 2014, PATRIOT MISSION launched the 5000 Veterans initiative to help our service members pursue self-employment, small business and entrepreneurial success. Currently PATRIOT GRANTS are available immediately to help qualified veterans participate in one of three PATRIOT MISSION programs; each of which is one year in length.

### **\$500 Apprentice Patriot Grant**

The first is our entrepreneurial apprentice program where veterans get to work alongside small business owners and their mentors while getting a valuable, real time education. This creates a fantastic environment so the apprentice can learn the pros and cons of starting a small business as well as learning how to be a valuable employee.

### **\$2500 Small Business Founder Patriot Grant**

The second PATRIOT GRANT supports a veteran who has already launched a business. This one year program connects them with a qualified mentor and an apprentice to work with them privately to support their goals, solve problems, save time and money. A key benefit of the Small Business Founder program is marketing exposure in the local community to drive more traffic to their front door.

### **\$5000 Business Development Partner Patriot Grant**

The third PATRIOT GRANT is designed for a very qualified veteran who is available to fill one of our senior positions as a PATRIOT MISSION Development Director. This one year program includes the establishment of an LLC or S-Corporation for the veteran along with monthly tax and business consulting. The veteran will have access to a turnkey business system and will work directly with our management team to implement The POWER of Small Business Project in a community of at least 25,000 people. This PATRIOT GRANT also provides support to participate in high level, live training events and experiential learning that will serve the veteran.

Between now and the end of 2017, PATRIOT MISSION expects to hire at least 10,000 self-employed Development Directors and our goal is that at least 10% of those will be funded by PATRIOT GRANTS. Of course that is only possible with the dedication and commitments of fellow PATRIOTS like you.

**PATRIOT MISSION will match every grant up to the first \$1,000,000 in support.**
